Handbook of Selected Statistics on Saskatchewan Trade 1988

Saskatchewan

FOREWORD

The Handbook of Selected Statistics on Saskatchewan Trade (1988 edition) has been compiled to present in one volume a detailed measure of Saskatchewan exports to the world. The Handbook is a compilation of Statistics Canada and provincial data on exports laden and produced in Saskatchewan.

Prior to 1985, Saskatchewan exports of raw materials such as cereal grains, oilseeds, uranium, and potash fertilizer (potassium chloride muriate) were not attributed by Statistics Canada to the province in which these exports originated. This meant that some exports originating in Saskatchewan were included with the exports from British Columbia and Ontario. To correct these statistics, provincial production and sales figures were substituted and allocated by country using Canadian trade flow patterns.

Statistics Canada has since changed its measurement of exports to reflect province of origin. The data since 1985 reflect this change. Except for uranium statistics, which continue to be obtained from the Department of Energy and Mines, Saskatchewan export data reflect this new method. Uranium exports are an exception because the Statistics Canada data measure the exports of radioactive material comprised largely of uranium hexafluoride (UF_6) which is processed in Ontario. Provincial data reports exports of uranium oxide (U_3O_8) which Saskatchewan mines sell on a worldwide basis. Except for the United States, uranium data are not shown for individual years because of the sensitivity of the figures. Data are suppressed in the individual country data and in the commodity detail reports so that uranium statistics cannot be derived.
